PACO!

Possible the best module ever

(Like, I wouldn't be surprised if it was)

This is what you'll need:

- 9x
- PCB
- panel

You can download this from my Github

1. Place the components

Put them in their place

That's right

2. Screw the NUTS on

3. SOLDER WIRES

Big ol' double multiple

Thanks for building!

ENVELOPE ROUTER

OMG YOU'RE DONE!

There's not much more to it, So here are a few ways of using your PACO!:

Effects bypass
